

Company

Fieldlens is a cross platform app that modernizes documentation tools for the Construction industry.

Product

I worked on the Android Team—responsible for the maintenance of the app and implementation of new features (e.g. filtering, media view).

Project

I was tasked to create the Android Media Viewer and update the Android SDK Version from 22 to 23.

Improved media viewing experience by designing and implementing the Android Media Viewer. Users are no longer blocked by the app.

Updated deprecated HttpClient to OkHttp, and implemented new Permission Requests as per Google guidelines

UCSD

to Internship Connection...+1 more
posted on 09/07/2016

UCSD gave me a good foundation for Software Engineering—software principles, design patterns, agile/ development process—that was beneficial in my internship. I focused on using my Android and Human-Centered Design experiences.

I will bring the experience I gained in Android Development, in the Development Process, and in the Design Process to my future classes (CSE 190s).

CSE 110, CSE 112, CSE 170
